

CORRECT

Company Profile

About Us

Correct specializes in financial solutions, accounting advisory, and Enterprise Resource Planning (ERP) implementation. We help startups and medium-sized businesses streamline their operations, strengthen financial control, and turn financial data into clear insights that support better decisions

Our services are backed by more than **10** years of hands-on experience in accounting, financial management, and ERP implementation. By combining financial expertise with technical knowledge, we design solutions around each company's business model and stage of growth-rather .than applying a one-size-fits-all approach

Our Vision

To become the most trusted financial and operational partner for startups and medium-sized businesses throughout every stage of their growth

Our Mission

To help businesses build more efficient financial and operational systems through integrated solutions that improve data quality, connect processes, and give management a clearer foundation for planning and decision-making

Our Values

✔ Accuracy

Every figure and detail can influence a decision. That is why we follow clear review and verification procedures before delivering any output

✔ Integrity and Transparency

We define the scope and deliverables clearly and provide reports and recommendations that reflect the business as it is, with honesty and professionalism

✔ Confidentiality and Data Protection

We protect our clients' financial and operational data through strict confidentiality and security measures throughout our work together

✔ Commitment

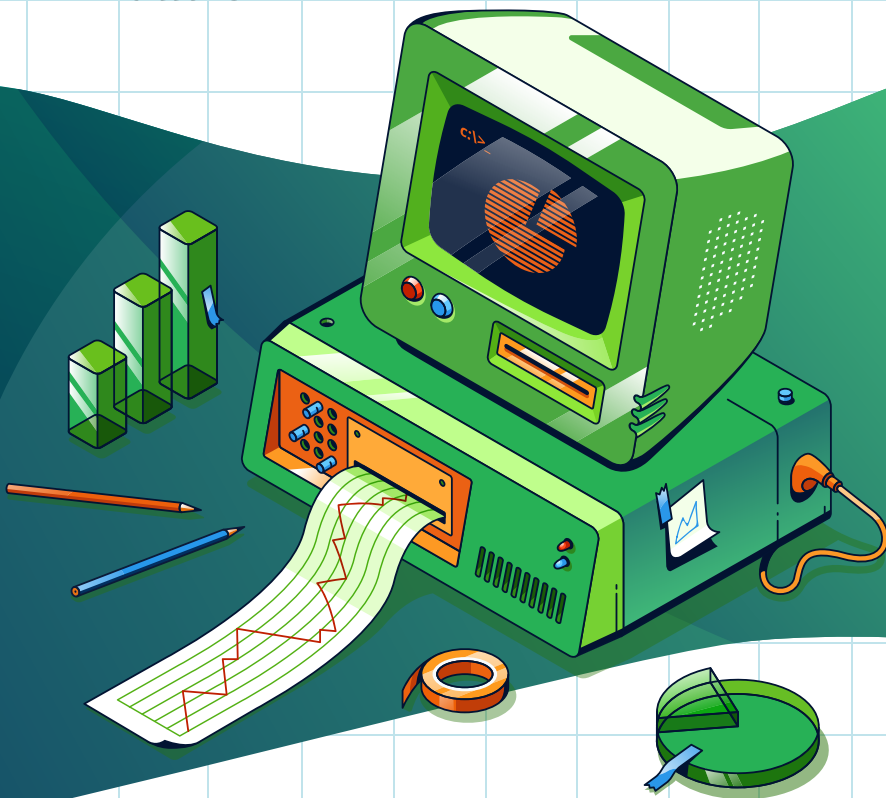

We deliver within the agreed scope and timelines, without compromising quality, while ensuring timely communication and support

✔ Solutions Designed for Each Business

We begin by understanding the business and its challenges, then design a solution aligned with its needs, resources, and objectives

Our Services

We provide connected financial, advisory, and technology solutions that help businesses organize their operations, strengthen control, and access clearer information when it matters

✔ Technology Solutions

ERP Implementation

We analyze processes, prepare data, configure the system, train users, and support go-live. This helps connect operations, reduce manual work, and improve data accuracy and accessibility

✓ Financial Solutions

● Bookkeeping

We record, classify, and document financial transactions in a structured manner, creating accurate records that support reporting, obligation tracking, and decision-making

● Financial Analysis

We analyze financial statements and data to provide indicators covering profitability, liquidity, and cash flow; enabling management to assess performance and identify risks and opportunities for improvement

● Outsourced CFO Services

We give businesses access to CFO-level expertise without the cost of a full-time appointment. Our support covers financial planning, budgeting, cash-flow management, performance monitoring, and strategic decision-making

Advisory and Assurance Solutions

● **Financial Advisory**

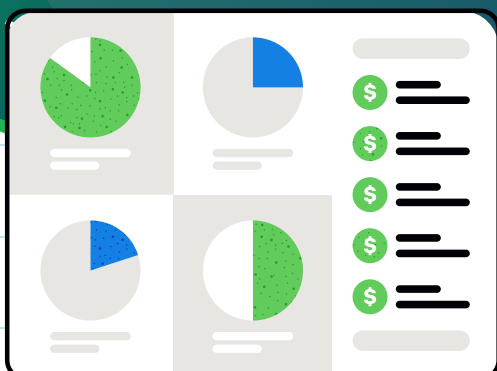

We provide practical recommendations to improve resource management and financial structure, with plans tailored to the company's objectives and stage of growth

● **Review and Assurance**

We review financial records, procedures, and controls to identify gaps and improvement opportunities, enhance data reliability, and strengthen internal controls

● **Tax Management**

We organize tax records and obligations, prepare tax returns, and provide the guidance required to comply with applicable legislation while reducing the risk of errors and delays

Why Correct?

✔ Integrated Financial and Technical Expertise

Our team brings more than **10** years of hands-on experience in accounting, financial management, and ERP implementation

✔ A Deeper Understanding of Your Business

We align every solution with the company's operations, industry, and stage of growth, making it practical and relevant to the actual need

✔ Deliverables Built for Decision-Making

We provide clear data, reports, and performance indicators that management can use to monitor results, plan ahead, and make informed decisions

✔ Support Beyond Delivery

We work alongside your team throughout implementation and go-live, then follow up on challenges and improvements

How We Work

✔ Understand the Business and Its Needs

We study the company's business model, operations, objectives, and challenges

✔ Assess the Current Situation

We review existing data, procedures, and systems to identify gaps and priorities

✔ Design the Solution

We define the scope, deliverables, and implementation plan in line with the company's needs and resources

✔ Implement and Review

We put the solution into practice, review data and process quality, and track progress with the relevant team

✔ Report and Follow Up

We deliver clear outputs and practical recommendations, then monitor results and refine the solution when needed

Industries We Serve

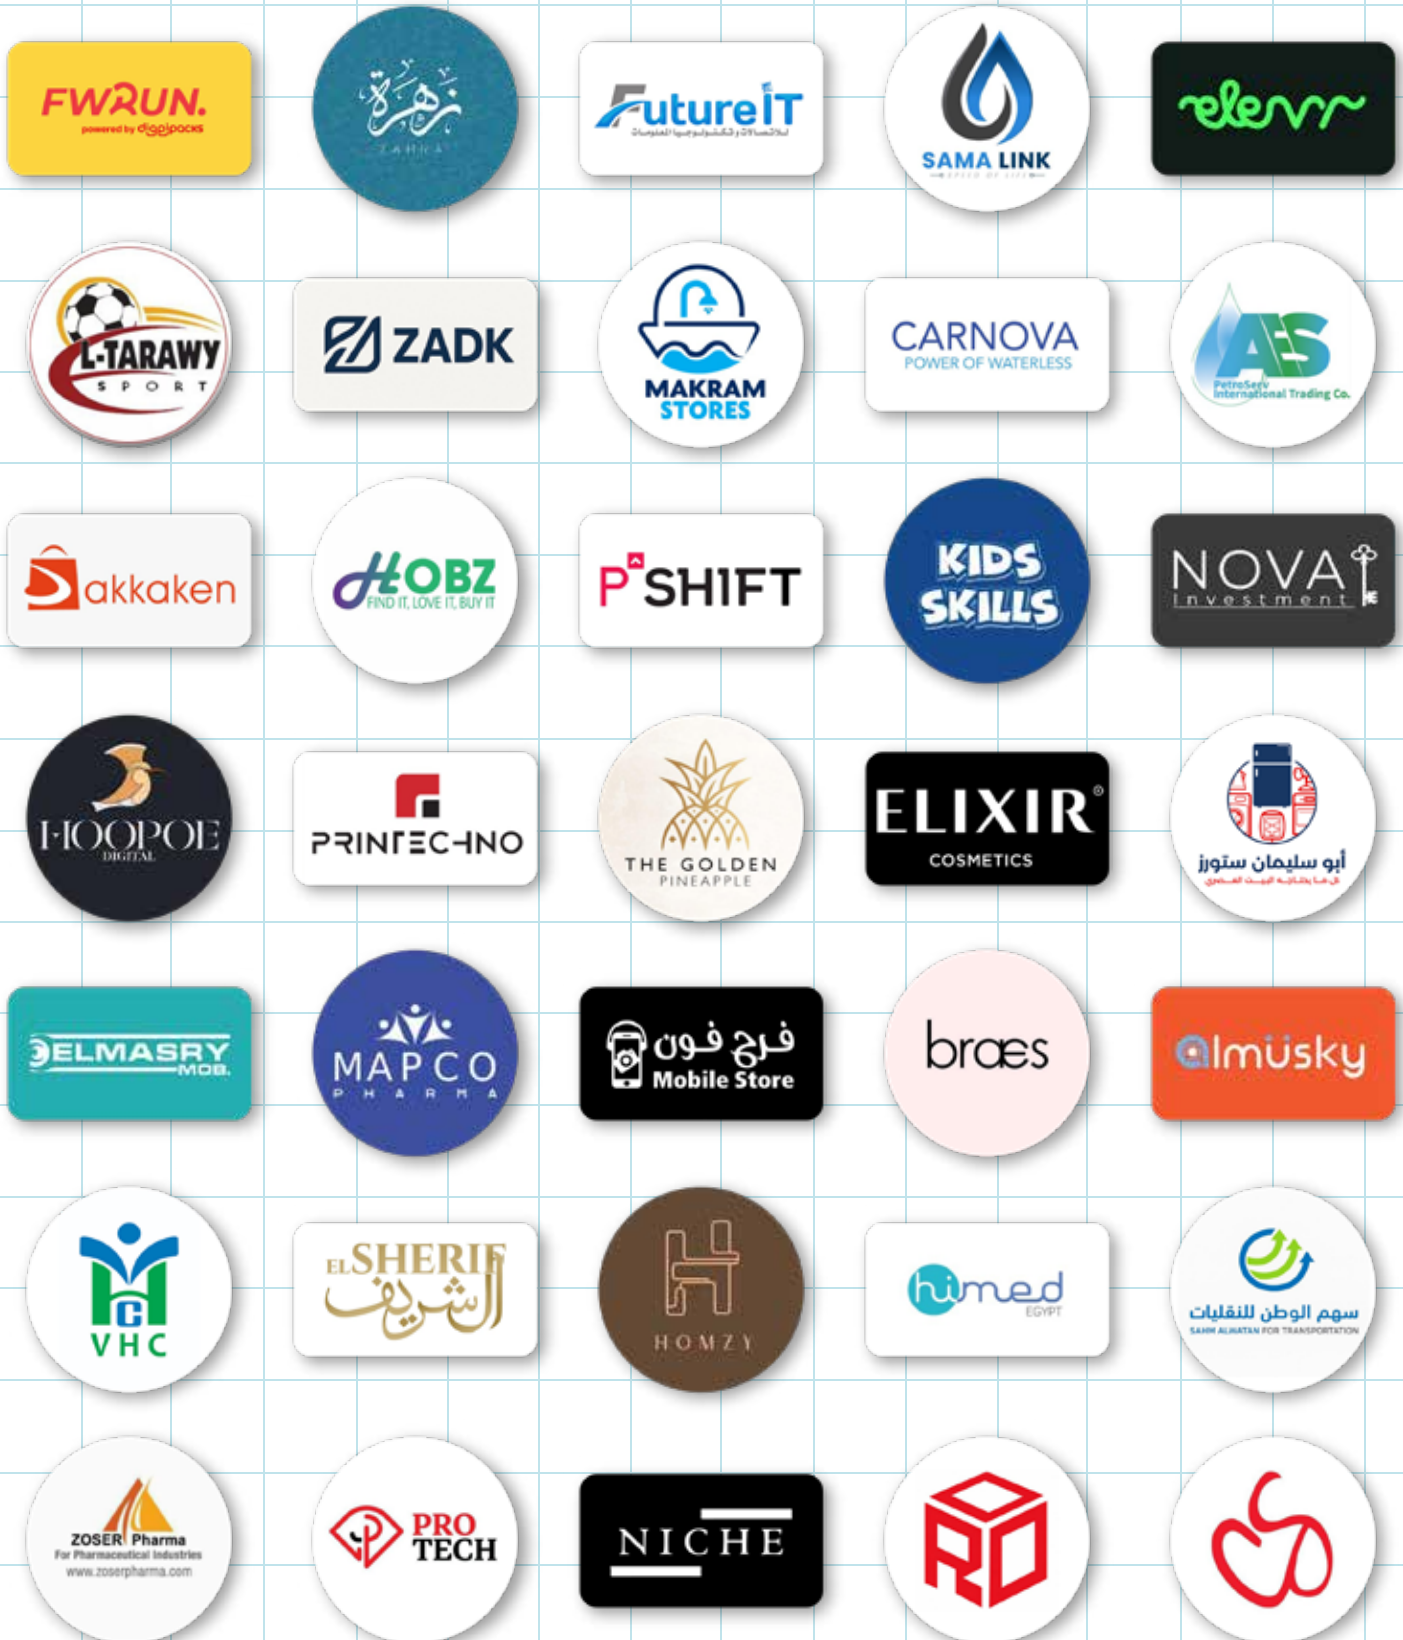

Financial and operational challenges vary from one industry to another. We therefore adapt the scope and delivery approach to fit the nature of each business

- ✔ E-commerce
- ✔ Retail and Wholesale
- ✔ Professional Services
- ✔ Service-Based Businesses
- ✔ Construction Companies
- ✔ Manufacturing Companies
- ✔ Restaurants and Cafés
